Press release
Wettingen, 13.07.2020

Keyon AG is the latest member of the Swiss IT Security Group

Dear customers, business partners and friends,

We are delighted to welcome Keyon AG, which is headquartered in Jona, Switzerland, as the latest member of the Swiss IT Security Group (SITS). As part of its ongoing growth strategy, the Swiss IT Security Group and its managing partners will be acquiring a 100% share in Keyon.
This is the Group's thirteenth acquisition since it was founded in 2017, and its sixth acquisition in Switzerland (MIT Group, Intellec and zapp IT were all successfully integrated into execure ag). Like Keynet and execure, Keyon will initially continue to operate as an independent company.

Keyon AG, founded in 1999, is a leading provider of solutions and services in the fields of IT security and customer-specific software development. The full-service provider specialises in the following areas:

Microsoft Cloud security: Specification, implementation and monitoring of comprehensive security and governance processes in the Microsoft O365 ecosystem

Enterprise PKI management: true-Xtender® – comprehensive solutions for the issuance, management and revocation of X.509 certificates on Windows, iOS, Android, Mac and Linux, and for the IoT

Digital signature services: true-Sign® – enterprise signature solution for documents, macro and code signatures. Supports qualified, advanced and corporate certificates

Enterprise key management, database and file encryption: Comprehensive technical and organisational solutions for the encryption of sensitive data

Software engineering: Design and implementation of customer-specific security solutions on premises and in the cloud

The Keyon management board all agree: 'Being a part of the Group will enable us to provide our customers with further services. We are convinced that the partnership with the SITS Group offers Keyon, its employees and its customers significant and immediate added value.'

'I am delighted to have acquired another Swiss member in Keyon. The company's philosophy, service portfolio and partnership with Microsoft fit our group perfectly,' says Philipp Stebler, CEO of Swiss IT Security AG.

Swiss IT Security AG is currently in talks with further companies in Germany, Austria and Switzerland with the aim of continuing to expand the Group in future. Today, the Group employs more than 400 highly qualified members of staff.
